Quiz . 15 Total Points

🎉🏆 WOW! You aced it! Perfect 100%! You're a quiz champion! 🏆🎉

Your marks : 15 / 15

1. What is AWS Lambda?

- ☐ A managed database service
- ☒ A serverless compute service
- ☐ A virtual machine service
- ☐ A storage service

✓ Correct!

2. Which of the following languages is NOT supported by AWS Lambda?

- ☐ Node.js
- ☐ Python
- ☒ C++
- ☐ Java

✓ Correct!

3. How does AWS Lambda charge for its services?

- ☐ Per instance hour
- ☒ Per request and compute time
- ☐ Monthly subscription
- ☐ Per data transfer

✓ Correct!

4. What is the maximum execution duration per request for AWS Lambda functions?

- ☐ 5 minutes
- ☒ 15 minutes
- ☐ 30 minutes
- ☐ Unlimited

✓ Correct!

5. AWS Lambda functions can be triggered by:

- ☐ Amazon S3 events
- ☐ HTTP requests via Amazon API Gateway

5. AWS Lambda functions can be triggered by:

- ☐ Amazon S3 events
- ☐ HTTP requests via Amazon API Gateway
- ☐ Changes in Amazon DynamoDB tables
- ☒ All of the above

✓ Correct!

6. What is AWS Lambda Layers?

- ☐ A way to manage your Lambda functions
- ☐ A feature to increase the execution time of your functions
- ☒ A way to share code and dependencies across multiple functions
- ☐ A tool for monitoring Lambda functions

✓ Correct!

7. Which AWS service is used to create a workflow that connects AWS Lambda functions?

- ☒ AWS Step Functions
- ☐ AWS Elastic Beanstalk

7. Which AWS service is used to create a workflow that connects AWS Lambda functions?

- ☒ AWS Step Functions
- ☐ AWS Elastic Beanstalk
- ☐ AWS Batch
- ☐ Amazon SWF

✓ Correct!

8. What is the cold start in AWS Lambda?

- ☐ Restarting a failed Lambda function
- ☒ The initial execution of a Lambda function that takes longer to start
- ☐ Cooling down period after a function execution
- ☐ Freezing code in between executions

✓ Correct!

9. What feature allows AWS Lambda functions to interact with VPC resources?

- ☐ VPC Flow Logs
- ☐ VPC Peering

9. What feature allows AWS Lambda functions to interact with VPC resources?

- ☐ VPC Flow Logs
- ☐ VPC Peering
- ☐ VPC Endpoints
- ☒ VPC Lambda integration

✓ Correct!

10. How can AWS Lambda environment variables be used?

- ☐ To store sensitive information in clear text
- ☐ To adjust the function's memory and timeout settings
- ☒ To pass operational parameters to your function
- ☐ To increase the maximum execution duration

✓ Correct!

11. AWS Lambda supports concurrency controls to:

- ☐ Limit the number of instances running a database
- ☒ Manage the number of simultaneous executions of a function

11. AWS Lambda supports concurrency controls to:

- ☐ Limit the number of instances running a database
- ☒ Manage the number of simultaneous executions of a function
- ☐ Increase the execution speed of functions
- ☐ Automatically scale up the memory

✓ Correct!

12. Which of the following is a use case for AWS Lambda?

- ☐ Hosting a static website
- ☐ Running long-duration jobs that exceed 15 minutes
- ☒ Real-time file processing
- ☐ Persistent database storage

✓ Correct!

13. AWS Lambda's execution role is used to:

- ☐ Define the maximum execution time for the function
- ☒ Grant the function permissions to AWS resources

13. AWS Lambda's execution role is used to:

- ☐ Define the maximum execution time for the function
- ☒ Grant the function permissions to AWS resources
- ☐ Control access to the Lambda function from the internet
- ☐ Specify the runtime environment for the function

✓ Correct!

14. What happens when a Lambda function is invoked synchronously?

- ☐ The function is executed immediately, but the response is not waited for
- ☐ The function execution is scheduled for later
- ☒ The function is executed, and the caller waits for the response
- ☐ The function execution is deferred until resources are available

✓ Correct!

15. Which AWS service is NOT directly integrated with AWS Lambda for function triggers?

- ☒ Amazon EC2
- ☐ Amazon S3

14. What happens when a Lambda function is invoked synchronously?

- ☐ The function is executed immediately, but the response is not waited for
- ☐ The function execution is scheduled for later
- ☒ The function is executed, and the caller waits for the response
- ☐ The function execution is deferred until resources are available

✓ Correct!

15. Which AWS service is NOT directly integrated with AWS Lambda for function triggers?

- ☒ Amazon EC2
- ☐ Amazon S3
- ☐ Amazon DynamoDB
- ☐ Amazon API Gateway

✓ Correct!
